Introduction

Business developer and sales professional with a strong B2B track record in technical solutions, HVAC, and industrial environments. Experienced in driving the full sales cycle, developing profitable service and product offerings, and building long-term customer and partner relationships through hands-on, customer-facing work.

Core Competencies

- B2B sales & full-cycle deal management (technical & solutions)
- Service and solution-oriented sales models
- Customer development & long-term relationship building
- Partner and installer network development
- Profitability responsibility & commercial ownership
- Technical understanding of machinery, installations, and field operations
- On-site customer work, remote and hybrid execution

Professional Experience

MedTech Startup – Co-founder & Business Development
2025–Present

- Leading commercial development and go-to-market strategy for a SaaS solution in a highly regulated technical environment
- Translating complex customer needs into structured offerings and sales material
- Driving early-stage sales processes, customer dialogue, and market entry strategy

Valeryd AB – Project Manager & Technical Sales Specialist
2023–Present

- Responsible for growing sales and product portfolio within technical components
- Developed B2B customer relationships and partner channels with focus on long-term value and profitability
- Conducted market analysis and supported strategic partnerships with key accounts
- Worked closely with internal stakeholders to ensure delivery quality and customer satisfaction

---

Hercules Grundläggning – Site Manager
2022–2023
